

You can help future generations prevent a cancer diagnosis.

We need heroes to give a vial of blood for a critical study in early cancer detection. Will you help save lives and give hope to countless people and families impacted by cancer?

You Can Advance Early Cancer Detection to Save Millions of Lives!

Preventa America's new Better Cancer Outcomes program is recruiting active cancer patients to donate blood samples for testing in a groundbreaking study to find a blood marker that can identify potential cancer cells a decade before they become a tumor.

The importance of discovering such a blood marker cannot be overstated. When a simple blood test can identify cancer cells up to 10 years before it turns into the disease, people will have the time to make the lifestyle and healthstyle changes that will prevent those cancer cells from developing. People will have the time to live their best lives.

“ Helping prevent cancer and reduce its heavy toll on people and families has been the driving force of my work and the work of Dr. Gabor Somlyai, president of **Preventa** and the unquestioned leader in cancer treatments with deuterium depleted water. We hope you will join us in supporting this important research. Together, we can stop cancer before it starts. ”

- Dr. T. Que Collins

The Answers May Be Found Within Your Blood

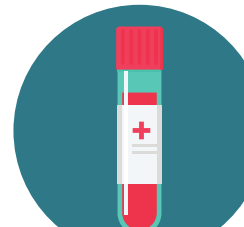

This project is dedicated to empowering people with effective tools to prevent cancer. But the project's success depends on people who have cancer or who know someone with cancer.

Help make your personal cancer story a part of an historic transformation in cancer prevention.

» Yes, I am interested!

Participation is simple. To make the process as easy as possible, an appointment will be scheduled for a phlebotomist to collect the blood sample in your home. **

All it takes is a moment of your time – and a vial of blood – to provide an invaluable service that could help save lives and prevent suffering.

All Donors Receive Rewards.*

Preventa America's Better Cancer Outcomes program is offering donor rewards valued over \$800.

Preventa® Deuterium-Depleted Water (Value up to \$325)

A free case of Preventa DDW. **Preventa** is the only DDW brand with published research studies and clinical trials showing its ability to improve the effectiveness of standard of care cancer treatments by decreasing side effects while significantly increasing both mean survival time and quality of life.

Deuterium Test Kit (Value \$250)

A free D-Terminator test kit to estimate the level of deuterium in your tissue and organs -- significantly more effective than saliva test kits.

Participants will get a Stipend (Value \$50)

A \$50 gift debit card to spend anywhere. Have a meal or movie on us

Kure Oxygen® Water (\$225)

Two free cases of Kure Oxygen water. Preliminary studies demonstrate regularly consuming Kure Oxygen water results in increased energy, healthier blood profiles, and an increased sense of health and wellness.
